

#### IN THE SPECIFICATION:

On page 78, lines 20 - 24, please replace the paragraph with the following:

After amplification, the PCR products were cloned into pCR2.1 vector (Invitrogen). The sequences of the products were confirmed. Then, the ZhoI-NotI fragment was inserted into the 4782 1872 pAN vector, following the IgG<sub>1</sub> CH3 domain in the same reading frame by a (Gly<sub>4</sub>Ser)<sub>3</sub> flexible linker. Sp2.0 murine myeloma cell line was selected as host for expression because it does not secrete any antibody.

#### IN THE FIGURES

Applicant encloses a replacement Figure 9.
